Description

The Robust Cardiff Cycle Shelter is a single-sided, free-standing bike shelter. Supplied with two-tier racks, this shelter is the best option on the market for parking a lot of bikes outside under a shelter. This Cardiff shelter is floor-fixed as standard, but legs are available for casting in or bolting down.

The Two Tier Cardiff Cycle Shelter is a substantial and practical option for mass bike storage. It's a freestanding, single-sided structure offering various roof options, including galvanised, colour-coated, or PVC profiled sheet, and is available in several sizes to accommodate different needs. The shelter can be either cast in or bolted down, making it a flexible and durable choice for a range of environments, from urban areas to educational and commercial settings.

The most impressive feature of this shelter is, however, its double-stacked bike storage racks, which allow you to save space and park twice as many bikes under the same roof. The two-tier racks are one of our bestselling products with a good reason – they are straightforward to use, they are space-maximising, and our more premium version comes with a gas strut, which makes putting a bike up the top level easy and effortless.

Options:

Our standard set-up comes with 20 bike spaces – 10 on the lower and 10 on the bottom tier; however, custom sizes are available; just speak to us. The shelter comes with two roof options – corrugated steel or clear polycarbonate. For your back and end panels, you can choose between – no panels, polycarbonate or wood cladding. And lastly, you can have the metal frame in a galvanised, powder-coated or both galvanised and powder-coated finishes.

Specification:

- Free standing, single-sided.
- Frame is made of 50mm mild steel box section.
- Roof options include galvanised (standard), galvanised and colour coated or PVC profiled sheet.
- Available ragged for casting in or flanged for bolting down.
