Description

The Hillmorton cycle stand is a variant of the classic Sheffield bike stand. The stand accommodates up to two bikes on each side of the hoop. It is an easy to use, traditional model offering high security cycle storage, the user can lock the wheel and frame to the stand using their own D-lock or chain.

The Hillmorton Cycle Stand is a durable and efficient bike parking solution, drawing on the classic Sheffield stand design. It provides secure and accessible storage for bicycles in public and private spaces. The stand's robust construction ensures longevity and reliability.

Options:

The Hillmorton bike stand can be manufactured with overground fixing and galvanised, powder-coated and galvanised or in stainless steel. It can also be made with underground fixing and galvanised, powder-coated and galvanised, or in stainless steel.

Specification:

- Available ragged for casting into the ground or flanged for bolting down
- 48mm overall diameter
- Wall thickness 3.25mm
- Ragged versions 300mm below ground
- Flanged versions require 3 12mm bolts per flange (6 per stand)
- Height above ground 750mm, length overall 750m
- Bolts are available extra
- Mild steel galvanised to BS EN ISO 1461 (1999)
- Stainless steel is grade 304 as standard
- Other colours available

Installation:

Mild steel and stainless steel flanged versions, a suitable surface - preferably concrete, should already exist for drilling into and bolting down. For ragged ends, a concrete foundation approx. 300mm cube is recommended, depending on ground conditions.

When positioned adjacent to one another, stands should be around 800mm apart and around 450mm from any wall or other obstruction.

Delivery Time:

5 - 7 days
