Description

The Cardiff Bike Shelter was designed from the ground up to be the best value-for-money sheltered bike parking on the market. Not compromising on construction quality, the frame is fabricated from box section steel tube for rigidity and longevity. This shelter is floor-fixed and free-standing, which makes it very versatile - it can be installed away from existing structures with back and end panels or can be situated next to an existing wall without the added back panel. The bike shelter uses Sheffield Bike Stands for maximum security bike parking that is also easy to use.

Standard version is legs and roof only with polycarbonate roof; please call for corrugated sheets; side and rear cladding is available as an optional extra, as well as secure gated versions. If you would like a quote for a gated shelter, please get in touch.

Options:

The bike shelter can be purchased with or without bike stands. It comes with the option to choose your finish, you can have the metal frame in a galvanised, powder-coated or both galvanised and powder-coated finish. There are options for the addition of back and side panels and a roof made of either polycarbonate or corrugated steel.

Specification:

- Free standing, single sided
- Complies with secure storage as required by the Code for Sustainable Homes
- Hot dipped galvanised finish is to BS EN ISO 1461:1999

Size: 10 bike space CDF1 - H:2100mm L: 4100mm W: 2100mm

Delivery Time:

2 to 4 weeks
